PROFESSIONAL SUMMARY

Full stack software developer with experience building and testing scalable applications across modern software stacks. Developed interactive and automation-focused applications using technologies including OpenCV, MediaPipe, Python, ASP .NET, WebGL, and Three.js. Comfortable following agile development methodologies throughout the software development life-cycle.

EXPERIENCE

Web Developer

Wild Rice Canada | Toronto, ON

May 2026 – Present

- Designed and launched a responsive B2B/B2C platform, streamlining the purchasing pipeline for retail, wholesale, and international export orders.
- Developed clean, accessible UI components to strengthen brand identity and drive customer engagement.

E-Commerce Developer

Awash Variety | Toronto, ON

Mar 2026 – Present

- Engineered and deployed a scalable e-commerce catalog, organizing hundreds of specialty products into a highly navigable digital storefront.
- Optimized digital inventory layout and categorization systems to improve user experience and product discoverability.

EDUCATION

George Brown Polytechnic | Toronto, ON

Diploma in Computer Programming

September 2024 – April 2026

Certifications:

AWS Certified AI Practitioner [Verify]

IBM AI Enterprise Workflow [Verify]

TECHNICAL SKILLS

- Full Stack Development:** C#, ASP.NET Core MVC, Entity Framework Core, Razor, RESTful API design
- Frontend Engineering:** JavaScript, TypeScript, React, Tailwind CSS, Three.js, WebGL, HTML, CSS
- Database & Data Modeling:** SQL, PostgreSQL, MySQL, SQLite, EF Core, Schema design, Query Optimization, Relational Databases & Cube Design.
- Cloud & DevOps:** Azure, AWS, Docker, Vercel, CI/CD, Git, Jira, Linux/Bash automation
- Backend & Enterprise:** Java, Spring Boot, Python, MVC architecture
- Services & Tools:** Google Workspace, Microsoft Office Suite, Canva, Visual Paradigm

PROJECTS

Ozark LMS

ASP.NET Core, C#, PostgreSQL, Azure

Jan 2026 – Mar 2026

[Link] | [Code]

- Engineered a role-based learning management system featuring dynamic assessment interfaces.
- Outcome:** Successfully deployed a scalable, production-ready educational platform with secure relational data persistence.

Cosmic Fusion

Three.js, WebGL, JavaScript, HTML/CSS

Feb 2026 – Mar 2026

[Link] | [Code]

- Developed an interactive 3D solar system and galaxy simulation rendering real-time particle systems.
- Outcome:** Delivered a highly performant, browser-based visual experience optimized for responsive device rotation and full-screen environments.

Mac Scraper

Python, Spotlight API, macOS

Jan 2026 – Feb 2026

[Code]

- Built a system utility utilizing native APIs for instantaneous system-wide file searching and dynamic filtering.
- Outcome:** Delivered a high-speed diagnostic tool that significantly reduced local search times and exposed raw machine metrics.

Air Cursor

Python, OpenCV, MediaPipe

Feb 2026 – Apr 2026

[Code]

- Developed a multi-threaded desktop application to process real-time, touchless gesture control.
- Outcome:** Created a responsive gesture-recognition interface with robust coordinate tracking.
